

Where do I put the Diaper Pail?

Keep it next to your diaper changing area

The diaper pail can be kept in your nursery near where you change diapers the majority of the time. The liner can be kept open for ease of use or closed to help contain any odor.

Place it in garage, porch, basement or bathroom

Keep a smaller covered trash can near your changing station to collect dirty diapers. When needed, transfer dirties to your diaper pail kept elsewhere such as the garage or basement.

Rent additional diaper pail from Do Good

Give us a call to rent an additional diaper pail and liner. Have one near your changing station and one in bathroom, basement, garage, etc.

Tips on controlling odor

1. Dump solid waste into toilet
2. Utilize deodorizing discs or make your own with essential oils
3. Cinch liner closed between diaper changes
4. Give your diaper pail a good cleaning with soap and water and let dry in the sun
